

How do I watch my event?

How do I view this event?

The easiest way to view your streaming event is from the email confirmation you receive at the completion of your order. From the body of the email, you can click the "Watch Stream" button and you'll be navigated directly to your browser to view the event.

Or you can select "**Click HERE to Download Access Codes and receipt**" to download your ticket packet. The second page of the ticket packet will show your actual ticket. From here, there are three ways to access your streaming event.

- You can click where it says "HERE" to be instantly connected.
- You can go to www.showtix4u.com/stream and enter the 6 digit alphanumeric code shown in the email and also in the ticket packet you can download.
- You can scan the QR code on your ticket to connect to your event on your mobile device.

Keep in mind you'll want to be on an updated browser such as Chrome, Firefox, Safari, or Edge. There is more information regarding compatible browsers [here](#).
